Manage Events, Share And Collaborate Enjoy Together

## The Challenge For Me

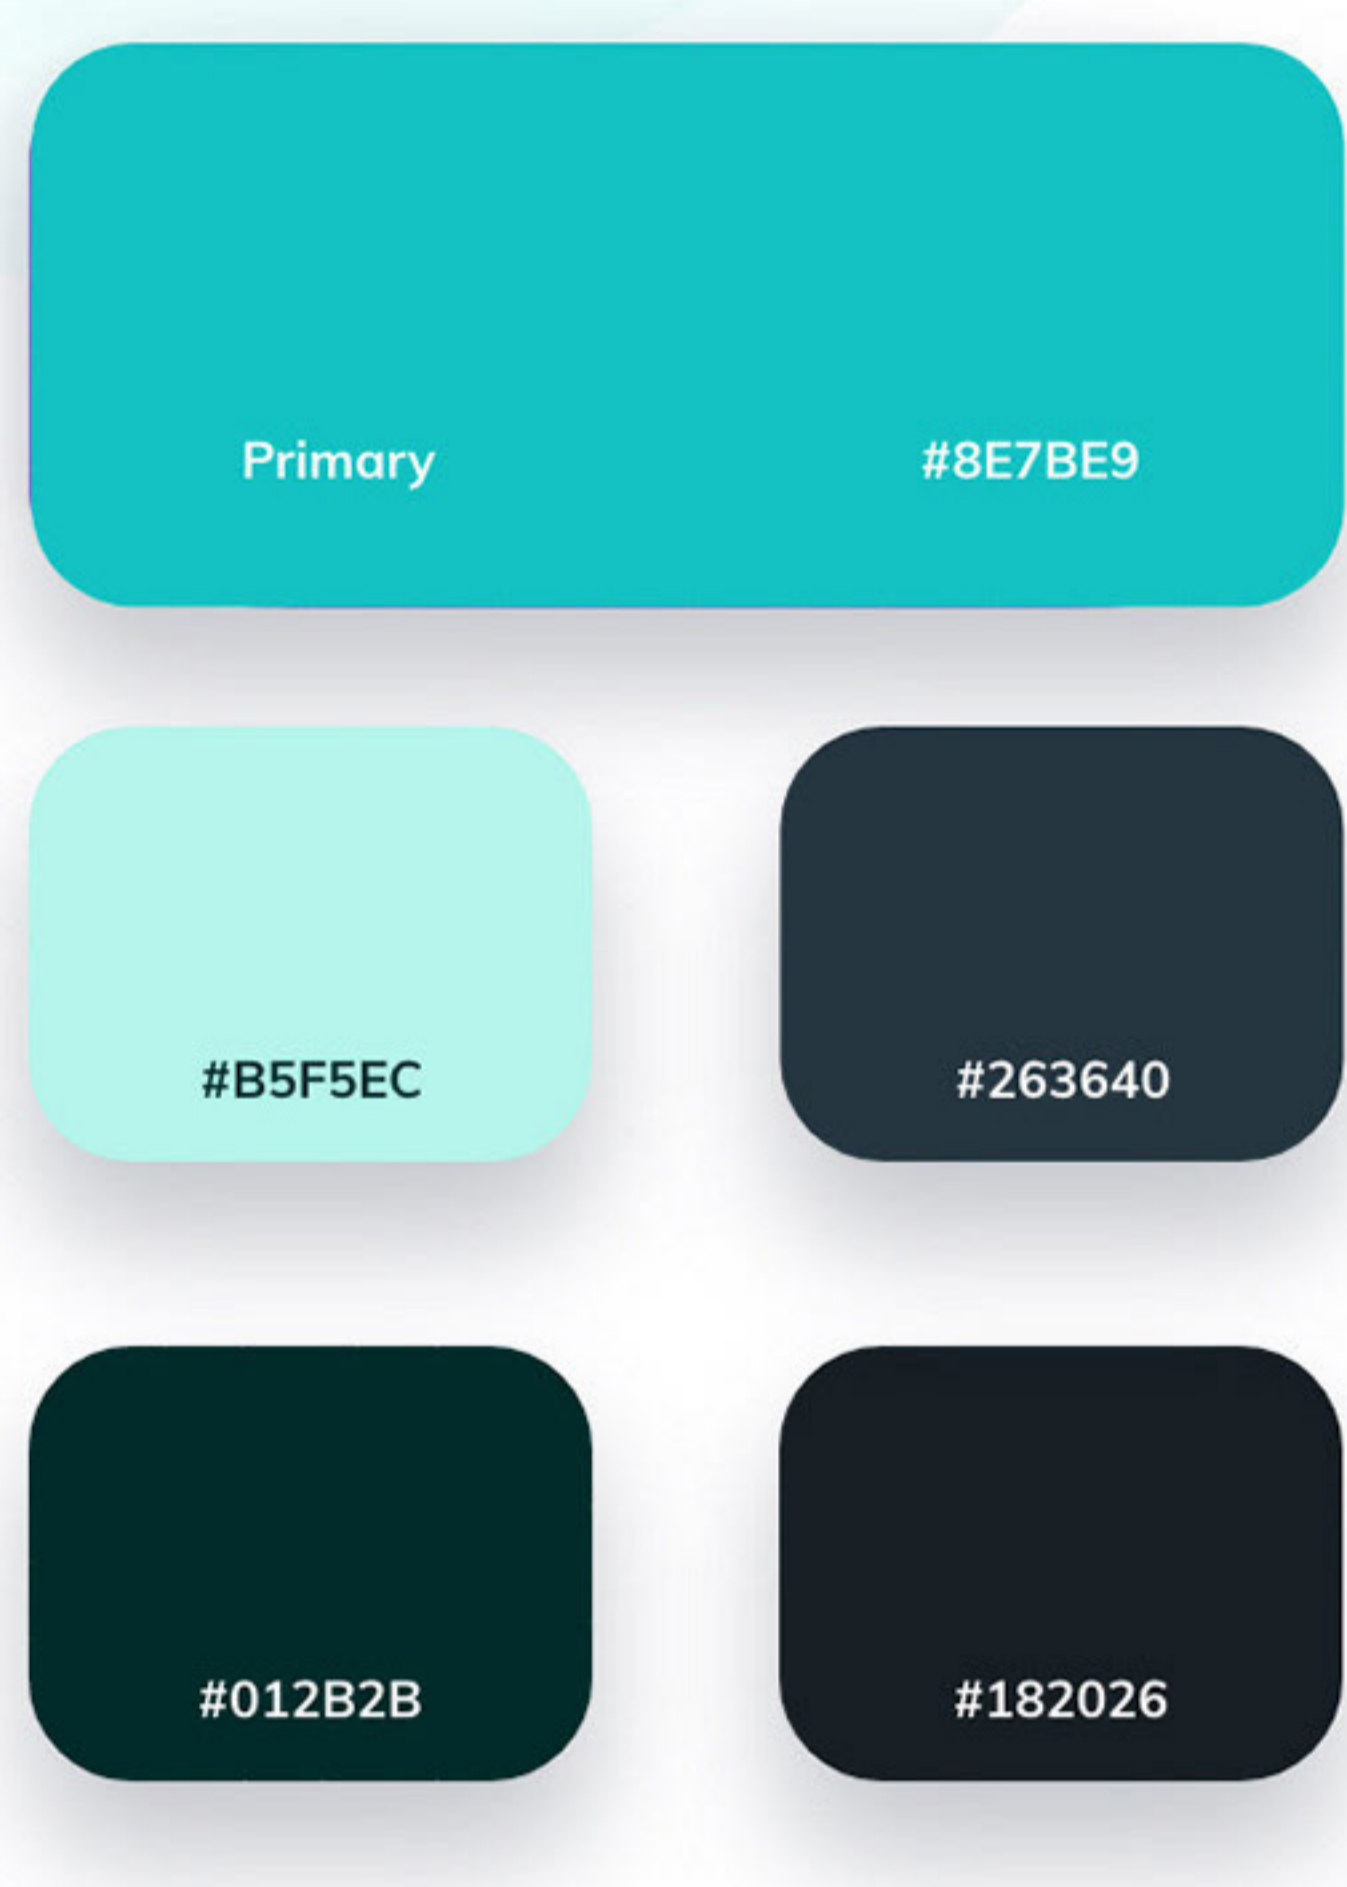

The first challenge to redesign this app is to cater a very large scale of target audience (16-50+), so for achieving this goal I need to stick with very subtle colors and try to design every screen as minimal as possible. Large and Clear CTAs was essential for driving the perfect user experience. And lots of other challenges.

## Dark Mode

Design all screens with dark modes to give the users a better user experience in dark and dim light.
